

Chief Security Officer as a Service (CSOaaS)

CSOaaS OVERVIEW

GoldSky Security takes a risk-based approach to security. It's understood that security is not something that can ever be fully implemented. Therefore, we work with our clients to progress through the security maturity model, building a more secure organization from the ground-up. This progression involves various processes, such as: determining compliance or regulatory requirements; negotiating security requirements with partners; development of policies and procedures; assisting in security-related human resource matters; development of threat models; and more.

SAMPLING OF SERVICES

Security Risk Assessments - Perform a NIST based security risk assessment to identify gaps and vulnerabilities within your environment.

Remediation & Policy Development - Develop IT and security policies to achieve compliance and increase the security of the organization through defined and repeatable processes.

Compliance Management - Identify, plan, manage, and budget the adherence to cybersecurity compliance programs, as applicable to the client.

Vendor Management - Work with existing new vendors to ensure their compliance with security best practices and security compliance objectives.

Incident Response & Disaster Recovery - Prepare and perform incident response table top exercises for the Company to ensure proper handling needed.

Technology Selection - Assist in selection of security technologies, to include remote monitoring, SIEM, Endpoint Security, and more.

On-demand CSO services that allow you to invest in the protection and growth of your business without incurring the cost of full time employees

"We could not be more pleased with our partnership with GoldSky Security. The experience and professionalism from your team has exceeded our expectations from day one. Your team was on-site within a week of our initial call. We appreciate the responsiveness and expertise you provided in performing our NIST 800-171 Gap Assessment and now CSOaaS program. Having an On-Demand CSO partner to assist us in building a sound cybersecurity program while maintaining NIST 800-171 compliance has proven to be both efficient and cost-effective. Thanks!"
