

# Healthcare Security Program (HSP)

## HSP PROGRAM OVERVIEW

Secure your medical practice with our comprehensive healthcare security program. GoldSky designed this package to be an affordable and effective means of ensuring that your practice meets and maintains appropriate security standards HIPAA/HITECH compliance mandates.

The GoldSky approach first involves understanding your current situation and defining a remediation roadmap to achieve appropriate security and compliance.

Throughout the year, practice employees receive required training on safe computer use as well as co-branded newsletters to help encourage a more security-aware workforce.

## PROGRAM SERVICE OFFERING

- HIPAA Security Risk Assessment
- CSOaaS Protection Services
- Security Plan Development
- Monthly Vulnerability Scans
- Security Awareness Training
- Incident Response Planning
- Disaster Recovery & Business Continuity Planning
- Endpoint Security Protection

“We are grateful to have GoldSky as our IT security and compliance partner in the SMB marketplace. Thank you for the expertise you provided in performing our annual Security Risk Assessment and HIPAA Compliance Review. You all are incredibly smart and ahead of the game when it comes to assessing a company and providing affordable and efficient IT security and technology solutions!”
